

AUDIO/VISUAL SERVICES

The Conference Center offers a wide variety of audio/visual equipment included in the CMP package.

- **Easels/Flipcharts**

With many easels in the Conference Center inventory, poster sessions are easily facilitated. When requested for a meeting, flipcharts and markers are always provided on the easels.

- **Laser Pointers and Wireless Presenters**

Wireless presenters and laser pointers may be checked out by the conference organizer at the Front Desk.

- **Microphones**

The Center offers sound capabilities as necessary, depending on room size. Several of our main meeting rooms have built-in sound systems. Wireless lapel and handheld microphones are also available. A panel microphone system with moderator override is available in our largest meeting room.

- **Overhead Projectors**

The Center maintains high-quality overhead projectors, some of which are high-lumen for computer projection with your own LCD panel. If transparencies are needed, they can be produced by us from your originals for a small fee. All overhead projectors come with a screen and transparency markers.

- **Podiums**

Available for lecturers, some podiums are equipped with a microphone and light.

- **Portable Assistive Listening Systems**

There are two assistive listening devices available for use in meeting rooms for those conferees that may be hearing impaired.

- **Slide Projectors**

There are 35mm slide projectors for conference use, with wireless remote controls and an automatic self-timer available upon request.

- **Stereo CD/MP3 Input**

These are available on request for use in meetings or social events.

- **DVD and Blu-Ray Players with Monitors**

DVD and Blu-Ray players are available for conference use. Several screen sizes assure clear visibility for the entire group.

- **Video Conferencing Services**

Available for an additional fee, we can arrange video conferencing for your meetings.

- **Video Projectors**

For groups of over 40 people, we recommend a video projector and a seven-foot screen. Computer graphics can be projected on our high-resolution video and computer projectors.

- **White Boards**

All easels at the Conference Center are reversible to white boards. We also provide dry erase markers and erasers.

- **High Speed Wireless Internet**

Complimentary Wi-Fi is available throughout the property, including all meeting rooms.
